

Enabling JavaScript

Internet Explorer

1. Click the **Tools** link at the top of your browser and select **Internet Options**. If you can't see the **Tools** menu, right click the area of your browser below the address section and select **Menu Bar**. This will make the **Tools** item visible.
2. Select the **Security** tab.
3. Click the **Internet** icon.
4. Click the **Custom Level** button. In the window that opens, scroll down until you reach the **Scripting** section (near the bottom of the list).
5. In the **Active Scripting** section, click the **Enable** button.
6. Click **OK** to close the Security Settings box, then **OK** to close the Internet Options box.
7. Close down all browser windows, then restart Internet Explorer.

Mozilla Firefox

1. Click the **Tools** link at the top of your browser and select **Options**. If you can't see the **Tools** menu, press the **Alt** key on your keyboard. The menu bar will reappear at the top right of the screen. Click **View** then **Toolbars** and ensure the menu bar is ticked.
2. Select the **Content** tab.
3. Click **Enable JavaScript**.
4. Click **OK**.

Safari for Mac

1. Click the **Edit** link at the top of your browser and select **Preferences**.
2. Select the **Security** tab.
3. Click **Enable JavaScript**.
4. Close the dialog box.

Google Chrome

1. Click the spanner or wrench icon at the top left of your browser and select **Options**.
2. Click **Under the Bonnet** (this may also be called **Under the Hood**).
3. In the Privacy section, click **Content Settings**.
4. In the JavaScript section, click **Allow all sites to run JavaScript (recommended)**.
