

ASSESSMENT GAMES

THE NEW GENERATION OF CANDIDATE ASSESSMENT

Revelian's game-based psychometric assessments combine the rigour and science of traditional tests, with an engaging and fun candidate experience.

By merging game design thinking with trusted and proven psychometric principles, Revelian's assessment games provide deep insight to inform better hiring decisions, and a rich, immersive experience for your candidates.

The many benefits of assessment games include:

- We collect up to 10,000 analysable events per game session.
- Games are robust against "faking" and response distortion.
- Instant player feedback keeps candidates engaged and aware of how well they are doing.
- We can capture and measure different responses to play, and infer how individuals may apply these approaches to other contexts.

Easy to use, challenging and applicable. Makes you think about how the game applies to your skill set and those required by the employer.

Friendly and relaxing, with just enough of a competitive urge to do well.

Very interactive, clearly tested my skills, but in a more enjoyable way than other similar assessments.

EMOTIFY

MEASURES

Two key aspects of emotional intelligence: emotional perception and emotional understanding.

TIME

Approximately 20 minutes to complete both mini-assessments.

ROLES

Use for all roles, especially when interpersonal interaction is an important factor.

DEVICE AGNOSTIC

Emotify is mobile adaptive and can be played on a range of devices as well as laptop and desktop.

Emotify is one of the world's few ability-based measures of emotional intelligence (EI) and is comprised of two separate assessments: **Matching Faces** and **Emotional Ties**.

These assessments have been specifically developed to assess a candidate's ability to accurately perceive emotions and effectively understand the connections between emotions, and situations that lead to specific emotional reactions.

GAMES INCLUDED IN EMOTIFY

In **Matching Faces**, the candidate is required to quickly identify the emotion displayed on a person's face.

In **Emotional Ties**, the candidate needs to read a number of every day situations and predict the types of emotional consequences that may arise as a result of these situations.
